| **Gender:** | Male | **Email:** | hault.dev@gmail.com |
| **Dob:** | 20/01/2001 | **Github:** | https://github.com/leetrunghaau |
| **Phone:** | 036 701 6872 | **Location:** | Ho Chi Minh City |

## Professional Summary

- Backend-focused developer with experience building RESTful APIs using Node.js, Express, and relational databases.
- Experienced in designing backend services, database schemas, and containerized applications with Docker.
- Interested in backend engineering, scalable system design, and practical AI applications.

## Experience

### EVN HCMC IT Company

Sep 2023 - Dec 2023

**Full-stack Intern**

- Implemented authentication and authorization services using C# and ASP.NET Core.
- Developed and integrated frontend components with backend APIs to support internal web applications.
- Collaborated with team members on both backend services and frontend integration.

### VIETMAP Co., Ltd.

Jul 2024 - Oct 2024

**Developer intern**

- Developed custom QGIS plugins using Python to automate geospatial data processing workflows.
- Implemented Python scripts for data transformation, validation, and geospatial analysis.
- Researched and integrated Kart, a Git-based data version control system, for managing geospatial datasets.

## Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript
- **Backend:** Node.js, Express.js, RESTful API Design
- **Frontend:** React.js, Next.js, HTML, CSS
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, GitHub, Docker, Postman

## Education

### HCMC University of Technology and Education

Bachelor of Information Technology.

## Personal Projects

### Medly - Medical Chatbot

Jun 2025 - Jun 2025

**Role:** Developer

- Built a Vietnamese medical chatbot using Retrieval-Augmented Generation (RAG).
- Implemented semantic search using FAISS to retrieve relevant medical knowledge from a custom dataset.
- Developed backend APIs using FastAPI to handle user queries and chatbot responses.

**Technologies:** Python, FastAPI, FAISS, SQLite.
**Team Size:** 2
**GitHub:** github.com/leetrunghaau/Medly

### Booking Care

May 2025 - Jun 2025

**Role:** Backend Developer

- Developed backend services for a medical appointment booking system using Node.js and Express.
- Designed RESTful APIs and database models for users, doctors, and appointment management using MySQL.
- Structured the backend with a modular architecture and containerized the service with Docker for consistent development and deployment.

**Technologies:** Node.js, Sequelize, MySQL, Docker.
**Team Size:** 2
**GitHub:** github.com/leetrunghaau/booking_care_BE
